DETAILED ACTION

1. The Amendment filed on 10/12/2006 has been entered.

Election/Restrictions

2. Claims 3, 5, 6, 9 and 13-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group and Species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/25/2006. Note the last Office Action relating to this issue.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 1, 4, 7, 8, 10 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
 - a. In claim 1, the phrase "the divided base material remainders..." lack clear antecedent basis.
 - b. Claim 7 is vague and indefinite in that the "dividing means" lack clear antecedent basis. Moreover, it is not clear what the "means" encompasses to the extent that it is not clear exactly what structure shown in Figs. 1-5 allows for formation of the divide. Substantially the same applies to claim 8.

Application/Control Number: 10/749,856

Art Unit: 3724

Claim Rejections - 35 USC § 103

Page 3

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 4. As best understood, claims 1, 4, 7, 8, 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Admitted Prior Art (e.g. Fig. 7 of the application) in view of Otsuki et al (JP 04-360796).

The Admitted Prior Art discloses the invention substantially as claimed except for a discharging means as claimed. However, Otsuki et al teaches an inherent dividing means for dividing the base material (e.g. 6) and a base material remainder discharging means for discharging the divided base material remainders in directions away from each other which facilitates ease of separating the main member (6A) from the remainder material. Note Fig. 5 and Abstract. Thus, it would have been obvious to the

Art Unit: 3724

ordinary artisan at the time of the instant invention to provide the device of Admitted Prior Art with the dividing means and base material remainder discharging means as taught and suggested by Otsuki et al in order to facilitate ease of separation of the main product from the base material.

Response to Arguments

5. Applicant's arguments filed 10/12/2006 have been fully considered but they are not persuasive.

In response to Applicant's basic argument that the combination does not render obvious the discharging means as claimed because it would not discharge remainders in directions away from each other and in a thickness direction of the member at a predetermined angle to the discharging direction, this argument is traversed. The Admitted Prior Art as shown in Fig. 7 already teaches the remainder being discharged in the thickness direction, and Otsuki et al teaches the separation of the remainders in directions away from each other and at a predetermined angle (note Figs. 5 and 6) from a discharging direction. Thus, the teachings of the references combined render obvious this limitation of the claim.

Conclusion

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3724

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles Goodman whose telephone number is (571) 272-4508. The examiner can normally be reached on Monday-Friday between 8:30 AM to 6:00 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer Ashley, can be reached on (571) 272-4502. In lieu of mailing, it is encouraged that all formal responses be faxed to (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.

Art Unit: 3724

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at (866) 217-9197 (toll-free).
